Excellence in Environmental Testing & Analysis

TEST REPORT

Test Report No:	VELC/2026/TR/1087	Sample Code	VELC/1472
Test Report Issue Date:	09-03-2026	Sample Receipt Date	02-03-2026
Issued To: **Name & Address of Customer:** **S.Ravi Teja** Cheepurupalli Village,Vijayanagaram District, Andhra Pradesh.553128 Ph.No:8375003180, 8500108811		Sample Registration Date	02-03-2026
		Sample Condition on Receipt	Fit for analysis
		Sample Quantity	1 liter
		Sample Description	**(Lemon and soap nut)#** Liquid, yellowish brown colour
		Analysis Started Date	02-03-2026
		Analysis Completed Date	09-03-2026
Sampling Date	---	Sampling Method	---
Sample Submitted by	Client	Sample Packing	Sealed Cover

TEST RESULTS

S.No	Test Parameter	Method Reference	Result	Observation
1	Antimicrobial Efficiency Test	Suspension Culture Method (based on ISO 22196 / AOAC disinfectant testing procedures)	41 CFU/mL	Reduction in microbial growth observed on Nutrient Agar
2	Selective Bacterial Survival Test	Culture Growth Observation Method	Turbidity observed	Indicates survival of non-pathogenic environmental bacteria
3	Sewage Compatibility Test	Activated Sludge Microbial Compatibility Test (based on OECD 209 concept)	Turbidity observed in nutrient broth	Indicates microbial activity compatible with biological treatment systems

Observations:

Antimicrobial Efficiency Test:
After exposure of microbial culture to the surface cleaner sample and incubation on Nutrient Agar plates, microbial colonies were observed with a count of **41 CFU/mL**, indicating reduction of microbial population compared to typical environmental microbial load.

Selective Bacterial Survival Test
Nutrient broth inoculated with environmental bacteria and exposed to the cleaner sample showed **visible turbidity**, indicating that beneficial or environmental bacteria were able to survive and grow.

Sewage Compatibility Test
Activated sludge microorganisms exposed to the cleaner sample showed **turbidity and microbial activity in nutrient broth**, suggesting that the product does not significantly inhibit microbial respiration or growth in wastewater treatment systems.

IS-Indian Standard.

Terms and conditions:

1. Test samples will be retained for 7 days from the report's issue date.
2. The test report shall not be reproduced except in full without approval from the authorized signatory
3. Test results apply only to the item as received and all tests are conducted at our permanent facility.
4. Disputes are subject to the jurisdiction of Visakhapatnam only.
